FSD Laboratory 06

Aim: Develop a set of REST API using Express and Node.
Objectives:

1. To define HTTP GET and POST operations.
2. To understand and make use of 'REST', 'a REST endpoint', 'API Integration', and 'API Invocation'
3. To understand the use of a REST Client to make POST and GET requests to an API.

Theory:

1. What is REST API?
2. Main purpose of REST API.

FAQ:

1. What are HTTP Request types?
2.

Output: Screenshots of the output to be attached.

Sample Problem Statements:

Creating and adding new book records in the book database using REST API.
